

Shapeoko Threaded Table

TOL-14908

If you need more ways to hold material in your Shapeoko, this Threaded Table provides you with plenty of connection points. Each Threaded Table fits perfectly into a Shapeoko v3 CNC (but unfortunately not the XL or XXL), contains over 90 M6x1 threaded holes, and is only $\frac{1}{2}$ " (12.7mm) thick. With as many connection points that the threaded table has, you will have plenty of possible configurations to mill and fabricate with!
